Appendix:

The Economic Impact of Visits in Kawarthas Northumberland (RTO 8) and, if applicable, the rest of Ontario: since no Ontario region is economically self-sustaining, in order to produce the goods and services demanded by its visitors, it will need to import some goods and services from other regions. As such, some of the economic benefits of the visitors' spending in Kawarthas Northumberland (RTO 8) will spill over to the rest of the province and to regions outside Ontario. Impacts outside Ontario are not estimated by the TREIM.

Gross Domestic Product (GDP): value of goods and services produced by labour and capital located within a country (or region), regardless of nationality of labour or ownership. GDP is measured at market prices which include net indirect taxes on products. Tourism GDP refers to the GDP generated in those businesses that directly produce or provide goods and services for travelers.

Direct impact: refers to the impact generated in businesses or sectors that produce or provide goods and services directly to travelers, e.g. accommodations, restaurants, recreations, travel agents, transportation and retail enterprises etc. Direct impact on GDP, employment and tax revenues is also called tourism GDP, tourism employment and tourism tax revenues.

Indirect impact: refers to the impact resulting from the expansion of demand from businesses or sectors directly produce or provide goods and services to travelers, to other businesses or sectors.

Induced impact: refers to the impact associated with the re-spending of labour income and /or profits earned in the industries that serve travelers directly and indirectly.

Employment: refers to number of jobs, it include full-time, part-time, seasonal and temporary employment (based on the share of the year worked), for both employed and self-employed workers.

Federal tax revenues: include personal income tax, corporate income tax, commodity tax (GST/HST, gas tax, excise tax, excise duty, air tax and trading profits) and payroll deduction that is collected by the federal government.

Provincial tax revenues: include personal income tax, corporate income tax, commodity tax (PST/HST, gas tax, liquor gallonage tax, amusement tax and trading profits) and employer health tax that is collected by the Ontario provincial government.

Municipal tax revenues: include business and personal property and education taxes that are collected by the municipalities. Collection, however, does not follow immediately the consumption or production of goods and services in a municipality by visitors (as is the case with HST or personal income taxes). Rather, these taxes show the percent of the total property taxes collected by a municipality that can be attributed to tourism because of tourism's contribution to the economic activity of the municipality and hence its tax base.

Industry: The industry follows Statistics Canada's North America Industry Classification System (NAICS) Input-Output small aggregation industry classification.
